Directions for use

1. Substrate preparation

The substrate should be dry and free of grease, loose particles, dust, etc.

- Cracks or joints may be filled with ISOMASTIC-A acrylic sealant.
- Concrete imperfections should be repaired with DUOCRET polymer-modified mortar.
- Plastered wall may be repaired with UNICRET and UNICRET-FAST premixed mortars.
- For putting surfaces, STUCCOCRET spatula putty should be used.

The surface should be primed with the acrylic, micronized, water-based primer PRIMER CLASSIC, thinned up to 50% with clean water. PRIMER CLASSIC is also ideal to use for the stabilization of loose or crumbly substrates. Priming is not necessary on already painted surfaces as long as the old paint is sound.

2. Application

Before using, gently stir the content lightly and apply as it is or thinned 5-10% with clean water. ISOMAT PREMIUM COLOR is applied in two coats with a roller, brush or airless gun. The second coat is applied once the first one has completely dried.
